Great Majestic Range

A large shipment of Majestic Ranges recently went to South America. They hold the honor of being the first to pass through the Panama Canal.

But that honor isn't half so interesting to you as the causes which led up to it—

An exporter received orders from a firm in Chile to buy a quantity of ranges, the best made in America.

Many ranges were thoroughly investigated. The investigation proved that the Majestic gives the most economical and longest service, and the best baking results and it was chosen to fill the order from Chile.

The Majestic does not compete in price with any range. Its value depends solely on qualities which prove its economy in use. Its popularity in this country rests on the general judgment of American housewives who know the genuine economy of having the Majestic price and getting a range that saves fuel and repairs and gives much better baking results and much longer service than ordinary ranges. It's cheaper in the long run. Call at our store and give us the privilege of showing the Majestic advantages.
